## Objectives

### Objectives

- Institutionalization of higher education cooperation on the Raw Materials Sector in Central Europe
- Connecting the three sides of the Knowledge Triangle
- Higher Education-Research-Business
- Provide Smart Innovation Strategies on the Raw Materials sector in Central Europe Spanning the value-added chain from raw material to final product
- Bringing the ESEE Region to the EIT RawMaterials and the EIT RawMaterials to the ESEE Region

Please also see the Long Program Description.

### Biggest Achievement

The CEEPUS strategy of connection within Central Europe, follows the same philosophy of the integration of Central European partners into the education and research community by enabling the exchange of knowledge, expertise and innovation through the mobility of students on all levels, as well as through teaching staff mobility. By proposing a broad, yet precisely defined thematic network we believe that we will contribute to strengthen academic ties in the Raw Materials Sector across Central Europe.

One of the main tasks of RIC ESEE is bringing the ESEE Region to the EIT RawMaterials and the EIT RawMaterials to the ESEE Region and we believe that this strategy, as accentuation of the overall EIT RawMaterials sector, will allow the Central European Partners to participate in European Projects and funding schemes through RIC ESEE. Mobility of academics aims at the result of cooperation projects along the lines of the Knowledge Triangle will lead to the re-establishment of the ESEE region as confident industrial, research and academic player in the Raw Materials sector.

### Biggest Challenge

No hurdle is too big to be jumped; if your are seasoned enough in the CEEPUS system you learn to appreciate its creative ways of interpretation; in general the way short term excursions are budgeted is a bit problematic to enter. Maybe one could re-program the system for days to be entered and then automatically convert them to the months needed; the entering of 1 month at random institutions in that country is a bit problematic; but I am sure there will be a solution, as there always is with CEEPUS.

We are hoping that we are granted the mobility months as outlines, as they are really the basis for this further cooperation projet; one of the hurdles will be to motivate Austrian students for the participation, but we are aiming at enticing them through short courses and excursions, as well as internships, which are part of the curriculum at Leoben.

## How to

### Objectives:

What is it that your network is trying to achieve?  
The more concrete the description the better!

### Biggest Achievements

#### NEW Networks:

What is the most important thing you are trying to achieve?

#### PROLONGED Networks:

What was the biggest achievement of your network during the last academic year?

### Biggest Challenge

#### NEW Networks:

What do you estimate to be the biggest obstacle in trying to meet your goals?

#### PROLONGED Networks:

Which were the biggest obstacles encountered during the last academic year?
